

ENERGY POLICY

Every year, we shall provide documentation on the systematic work with energy improvement activities and actions, by:

- Reducing the specific energy consumption on the furnaces.
- Efficient energy use, cost efficiency and having sustainable energy sources.
- Training our employees to promote attentiveness when it comes to energy usage.
- Assessing the energy efficiency in all change processes, also including purchasing.
- Ensuring that the energy team has sufficient competence.

This policy substantiates on the method of the company for the organisation of improvement work and tangible targets and action plans within the scope of our management system for energy. They shall all satisfy the requirements in the NS-EN ISO 50001:2018 standard.
